Statement from the Chair/Associate Dean

NCBP is a matrix department within the Boonshoft School of Medicine (BSoM) and the College of Science and Mathematics (CoSM). NCBP faculty and staff strive to sustain excellence in basic, translational, and clinical research, while also providing the best in undergraduate, graduate, and medical education. Specific examples of the many accomplishments of our faculty and staff this past year (2021) include the following:

A. Research: Established/maintained well-funded research programs with a common focus on cell signaling in health and disease.

- 1) **Federal funding** – 2021 was a really strong year for NCBP faculty, with several additional large federal awards granted, and more to be awarded in 2022. Nearly all federal funding with >40% composite indirect rate (e.g., NIH, NSF, DARPA, AFRL)
- 2) **Core Facilities** utilized by >30 faculty from 3+ colleges – a. Microscopy, b. “BioBank”, c. Small animal physiology, d. tissue/ cell culture/gel documentation.
- 3) **Peer-reviewed publications** – ~30 peer-reviewed publications in high impact journals

B. Education:

- 1) **Medical student education** - NCBP faculty are involved in the development, administration, and/or delivery of all seven foundational modules in years 1 and 2 of the BSOM Wright Curriculum. NCBP faculty members direct six of seven basic science modules throughout these two years.
- 2) **Ph.D. education/training** – NCBP faculty members contribute significantly to the education/training of Ph.D. and M.D/Ph.D. students through mentoring students and delivery of core/elective courses, with the Ph.D. and the M.D/Ph.D. Program Directors now NCBP faculty members. Four NIH-funded NCBP faculty members secured minority Ph.D. student supplemental funding for MD/PhD students working in their labs – these were the first NIH minority supplements ever funded at Wright State! In 2021, two of these MD/PhD students received additional national awards – Jennae Shelby, working in Dr. Susuki’s lab, received an NIH F30, individual pre-doctoral fellowship, and Adaku Ume received the American Physiological Society, Porter Development Fellowship – both, the first ever awarded at WSU.
- 3) **M.S. degree programs** – Direct/deliver three, self-paying M.S. programs training ~40% of CoSM M.S. students. M.S. Programs in Anatomy, Microbiology & Immunology, and Physiology & Neuroscience provide interactive education and/or research experiences designed to prepare graduates for careers in the biomedical sciences. The Wright Bridge to UME program has proven successful, and provides opportunities that advantage students, our M.S. programs, and the BSOM UME program. Approval of a non-thesis M.S. in Physiology and Neuroscience should increase the size of our M.S. student body.
- 4) **4 + 1 BS to MS in Physiology and Neuroscience Program created** – In 2021, NCBP created a 4 +1 BS to MS degree program in our Physiology and Neuroscience degree programs that has already generated significant interest and participation, further enhancing our already large MS programs.
- 5) **Undergraduate education and programs**
 - a) NCBP faculty direct/deliver foundational “anatomy/physiology” courses annually to ~1,000 undergraduates.
 - b) The B.S. in Neuroscience program provides an innovative active learning educational experience designed to prepare graduates for careers in the biomedical sciences. In its third year, the program had ~100 majors.

C. Service: NCBP faculty are highly involved in service to their respective disciplines, the community, and within the University. Examples include: manuscript review, editorial board memberships, grant review panels, leadership roles in professional organizations, and membership/leadership roles in NCBP, CoSM, BSOM, and WSU committees.

D. Outreach: Examples include: Horizons in Medicine; STEMM; Women in Science Giving Circle; Destination Imagination; Neuroengineering Research for HS students.

Of particular note: Interactive lab experiences for high school students – NCBP faculty developed two interactive laboratory experiences for high school students: 1) Human Anatomy and Physiology (HAPI lab) and 2) NeuroLab. The HAPI lab completed its 7th year and has received significant regional and national acclaim as an exemplary experiential program designed to excite and educate high school students about the biomedical sciences. The NeuroLab was similarly successful in its first two years. For their efforts, the leaders of each experience, Ms. Bridgett Severt and Dr. Patrick Sonner, received the 2019 College of Science and Mathematics Faculty Excellence Award - Spirit of Innovation. Finally, Bridgett Severt, Pat Sonner, Nick Christian, and I worked together to formalize the NCBP high school outreach programs (HAPI and Neuro Labs) as bona fide recruitment efforts for which we received one of the inaugural Faculty Initiated Recruitment Program (FIIRP) awards (\$7,200). We recently also applied for a grant from the CareSource Foundation to support our efforts to include the development of a third program as well as enhance our outreach to and opportunities for students from regional urban and rural high schools.

E. Awards/Honors: NCBP faculty members received **five** teaching/mentoring/faculty awards in 2021, (and three additional awards to date in 2022!). Several B.S., M.S., Ph.D., M.D., and M.D./PhD. NCBP students received awards at the local and national levels.

Faculty awardees were:

1. President's Award for Outstanding NTE Faculty: Teaching (**B. Severt**)
2. Fellow for the American Heart Association (**C. Williams**)
3. Young Investigator Research Award by the American Physiology Society – Renal (**C. Williams**)
4. Academy of Medicine Award for Outstanding Junior Faculty BSOM (**C. Williams**)
5. Academy of Medicine Award for Outstanding Senior Faculty BSOM (**N. Bigley**)

GRADUATING STUDENTS IN 2021

ANATOMY (COURSE)

Amurgis, Lillian
Babel, Adrian
Bello, Sholabomi
Bragg-Brock, Taylor
Chandiramani, Candni
Drummond, Lauren
Issa, Yasmeeen
Johnston, Alexander
Khalilzadeh, Danielle
Muncrief, Matthew
Ragsdale, Victoria
Theodore, Dominic
Zeidler, Andrew

ANATOMY (THESIS)

Benedict, Valerie. *The Effect of Endogenous Ligands of the Aryl Hydrocarbon Receptor on Antibody Expression in a Human B-Cell Model.* **Courtney Sulentic**

Kinstedt, Christine. *Using Functionalized Benzylidene Oxindoles to Determine an Improved Monoamine Oxidase-B Inhibitor as a Therapeutic Agent for Parkinson's Disease.* **Daniel Ketcha**

Krech, Joshua. *Characterization of *Inhbb*, *Heatr5a*, & *Cyp2s1* Expression in Dorsal Root Ganglia by In-Situ Hybridization.* **David Ladle**

Williamitis, Joseph. *Using fMRI BOLD Imaging to Motion-Correct Associated, Simultaneously Imaged PET Data.* **Robert Lober**

PHYSIOLOGY AND NEUROSCIENCE (COURSE)

Ademhan, Devser
Molina, Andrea
Kinstedt, Christine
Vinston, Collin

PHYSIOLOGY AND NEUROSCIENCE (THESIS)

Grant, Delaney. *A Novel Method for Analysis of Proprioceptor Sensory Neuron Subtypes in the Mouse Dorsal Root Ganglia.* **David Ladle**

Webb, Cameron. *Effects of Fluoxetine/Simvastatin/Ascorbic Acid Combination Treatment on Neurogenesis and Functional Recovery in a Model of Multiple Sclerosis.* **Adrian Corbett**

MICROBIOLOGY AND IMMUNOLOGY (THESIS)

Alghanem, Nada Abdullah I. *M1 Pro-inflammatory Macrophages Exhibit Increased Expression of ACE2.* **Nancy Bigley**

Almohammdi, Mazen Saeed S. *Factors contributing to lower susceptibility of children to covid-19.* **Nancy Bigley**

Anderson, Bryce. *Treatment of Apical Periodontitis via Combination Therapy Using Purified Lactobacillus plantarum Lipoteichoic Acid and Intracanal Calcium Hydroxide.* **Dawn Wooley**

Bingham, Katherine. *The War on Drugs: How R-Type Pyocins Could be Used to Fight Bacterial Resistance.* **Nancy Bigley**

Calabro, Mark. *Investigating Streptococcus pneumoniae and Adenovirus Co-infections of Lung Epithelial Cells.* **Dawn Wooley**

Cox, Cora. *IL-10 and TGF-beta Increase Connexin-43 Expression and Membrane Potential of HL-1 Cardiomyocytes Coupled with RAW 264.7 Macrophages.* **Nancy Bigley**

Gohnaim, Alanoud Ghassan Y. *Type III as an Effective Therapy for COVID-19 Infection.* **Nancy Bigley**

Hosted events

February 19, 2021 – Dorothy Schafer, Ph.D., University of Massachusetts Medical School, Worcester, MA, Microglia and immune signaling at the synapse.

February 26, 2021 – Pawel Swietach, Ph.D., Corpus Christi College, The University Oxford, Oxford, UK, Diffusion in biological systems: can it still surprise us?

March 12, 2021 – Sami Noujaim, Ph.D., Morsani College of Medicine University of Southern Florida, Tampa, FL, From the structure of a potassium channel to the heart of a patient: How an antimalarial became an antiarrhythmic.

April 2, 2021 – Cristina Caldari-Torres, Ph.D., Denison University, Granville, OH, Modulation of adipose tissue-derived meta-inflammation by essential fatty acids.

April 9, 2021 – Sandra Garraway, Ph.D., Emory University, Atlanta, GA, Pain after SCI” What is happening in the periphery?

November 5, 2021 – Alfredo Garcia, Ph.D., University of Chicago, Chicago, IL, Breathing to learn and learning to breathe: Understanding the neurophysiological consequences of intermittent hypoxia and beyond.

November 12, 2021 – Matthew McMurray, Ph.D., Miami University, Oxford, OH, Behavioral effects and biological targets of psilocybin and its metabolites.

November 19, 2021 – Weiwen Long, Ph.D., Wright State University, Dayton, OH, A unique role of the F-box protein FBXL16 in proteosomal degradation and cancer development.

December 3, 2021 – Paola Leone, Ph.D., Rowan University, Glassboro, NJ, Gene therapy of neurodegenerative disorders.
