Relationship-Based Learning

Clinic Transformation

Triple Aim

Case Based Competencies / Training Modules

- Inter-professional (IP)
- Social Determinants of Health
- Patient Self-Management
- Stewardship of Resources
- Quality Improvement / Population Health
- Leadership Change

Goal and Objectives

At the conclusion of this activity, the participant will be able to:

- Recognize the social determinants of health in the presented simulated patient case.
 - Describe how the social determinants of health affect and interact with the simulated patient's presentation.
 - Apply their knowledge of the simulated patient's social determinants of health to develop a patient centered treatment plan.
- 

Video

Large Group Discussion

What else would you like to know about this patient?

Instructions for Patient Interviews

- End goal is a treatment plan to address the simulated patient social determinants of health
- The Simulated Patient interview will be the same case as the video
- Each team member will participate in asking questions
- Faculty members will assist you within your small groups
- Use the Table Top Exercise Form
- Begin planning for interview as we move the walls for small groups

Small Group Planning

Small Group Interviews

Small Group Debrief

Large Group Reflection

What did your team learn from the Life Course Game to inform the way you interacted with the Simulated Patient?

Large Group Reflection

**What Social Determinants of Health
did you identify?**

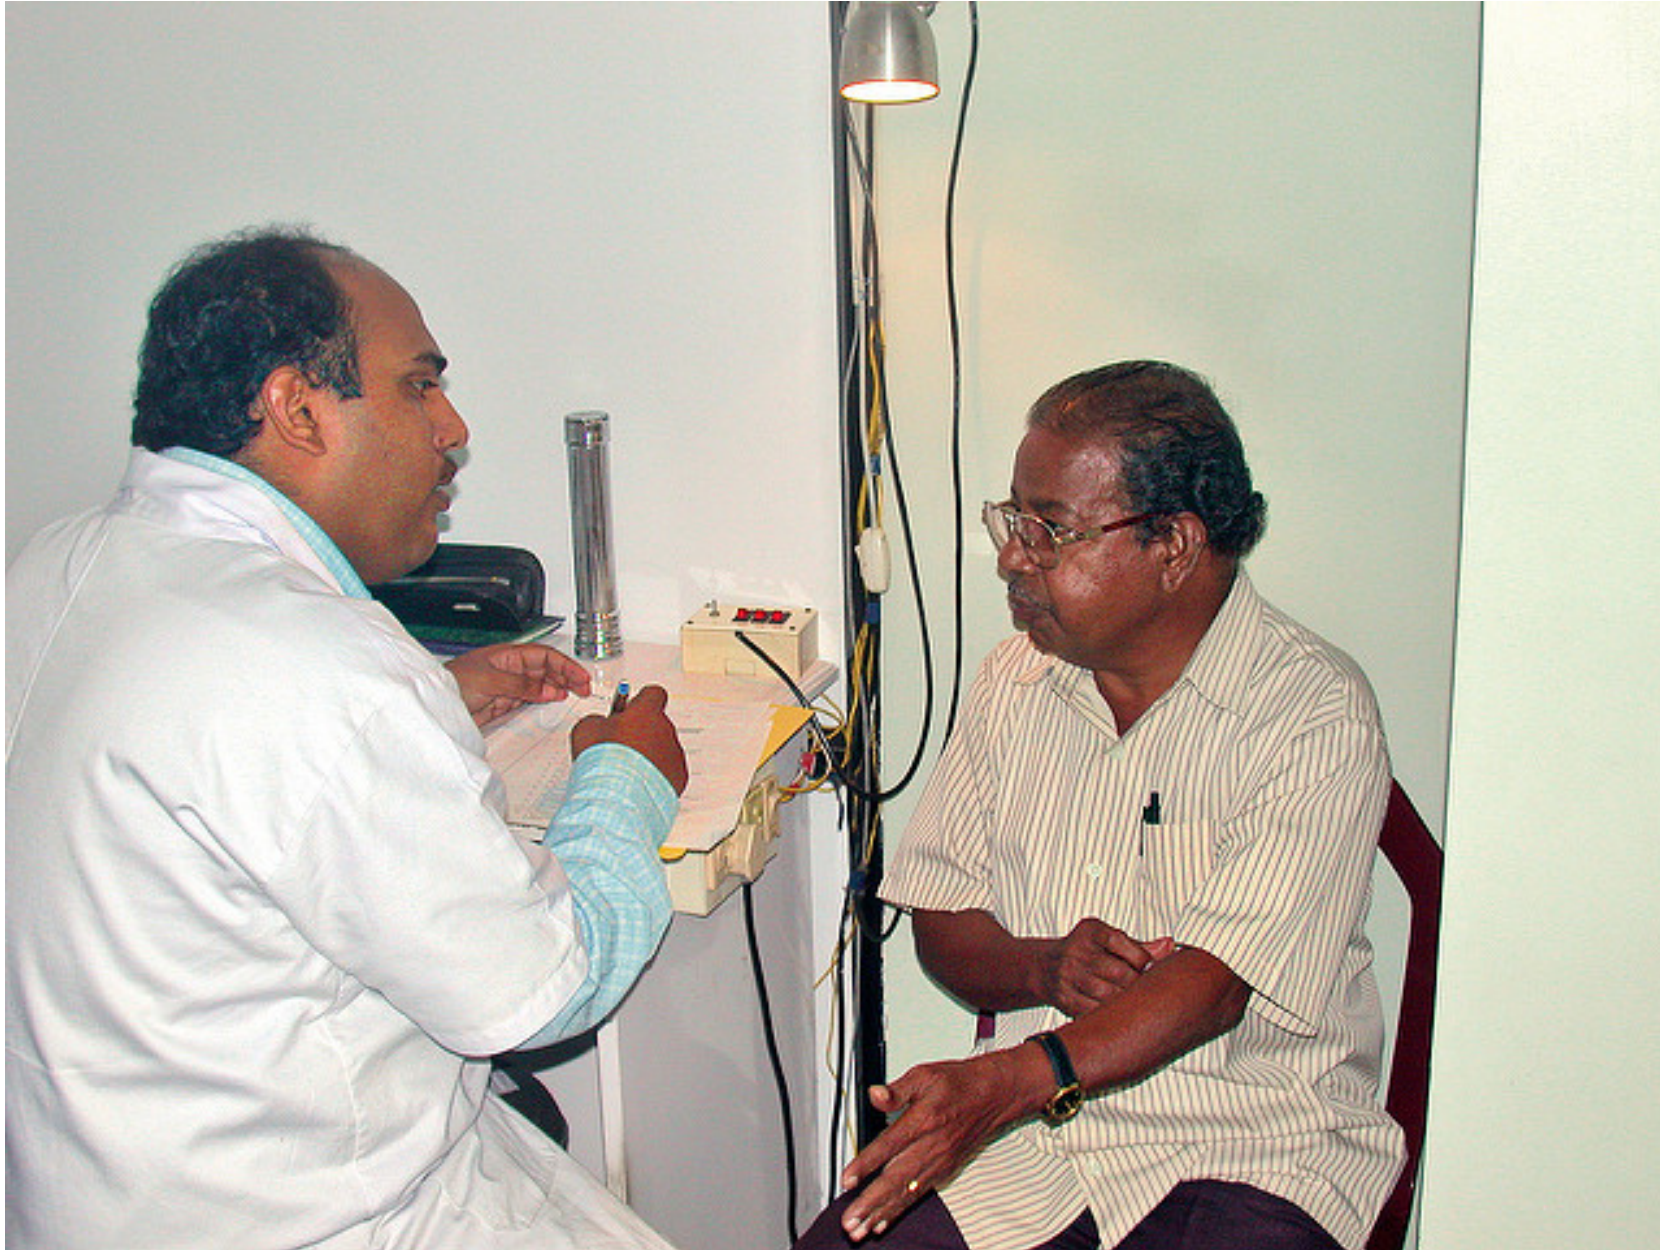

Large Group Reflection

How did your team address the social determinants of health to develop the treatment plan?

Large Group Reflection

**What was it like to work with your
inter-professional team on this case?**

Simulated Patient Feedback

Faculty Reflection

- What did you notice?
- Who took lead?
- What were the dynamics of the group?

**Thank You
for Your Participation!**

Final Wrap-up

- Launch post-assessment
- Feedback on tablets
